

GET THE MOST OUT OF AUTODESK INVENTOR WITH NVIDIA

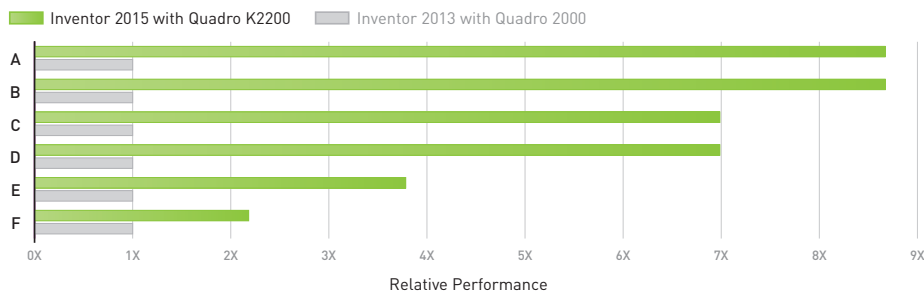

Design without limitations.

The latest NVIDIA® Quadro® graphics cards provide exceptional performance in all Inventor® 3D CAD software design modes. This means you can easily dial up the complexity of your designs, visualize every angle faster, and work out issues earlier in the design process.

Quickly Prepare for Design Reviews

NVIDIA professional graphics let you work faster in Showcase® as part of Autodesk Product Design Suite for design reviews and product walk-throughs. The more graphics horsepower you have, the faster Showcase will run. So you no longer need to worry if you have enough time to set up that perfect scene.

Create Fast Photorealistic Renders

3ds Max® Design in Product Design Suite gives you the power to create stunning photorealistic renderings for client reviews or marketing materials much faster. Because 3ds Max also takes full advantage of your NVIDIA graphics card, your renders can finish a whole lot faster. No more waiting overnight and catching mistakes too late.

Now, with the NVIDIA® Iray® renderer used in 3ds Max you can render up to 14x faster with NVIDIA Multi-GPU technology while continuing to work in all your other apps. This helps reduce, or in some cases eliminate, the number of expensive and time-consuming physical prototypes needed.
